Final

DIPLOMA CURRICULUM OF COMPUTER SCIENCE AND ENGINEERING (SECOND YEAR) (3rd Semester)

(To be implemented from 2025-26)

Prepared by;

National Institute of Technical Teachers' Training & Research Kolkata Block – FC, Sector – III, Salt Lake City, Kolkata – 700106

Vetted by:
Domain experts from Polytechnics of Odisha

State Council for Technical Education & Vocational Training Near Raj Bhawan, Unit-VIII, Bhubaneswar, Odisha

^{*3} to 4-week internship after 2nd Semester

*The best of 2 IA conducted in a subject out of 20 marks to be considered. Assignment/ quiz etc. of 10 marks to be treated as part of IA. Besides this, Monthly Test to be conducted for each subject. Sessional Marks shall be total of the performance of individual different jobs/ experiments in a subject throughout the semester. Club/Innovation/ Idea Tinkering Activities etc. shall be encouraged to be performed by students beyond the above stipulated hours.

SEMESTER - III COURSES

TH:1- PROGRAMMING WITH C++

| L 3 | T 0 | P 0 | | Course Code: CSE | PC 201/TH1 |
|-------------------|-----------|---------|------------------|------------------------|------------|
| Total Cont | act Hours | | | Theory Assessn | nent |
| Theory | | : 45Hrs | Total Marks: 100 | End Term Exam | : 70 |
| | | | Total Walks. 100 | Progressive Assessment | : 30 |
| Pre-Requis | site | : Nil | | | |
| Credit | | : 3 | | Category of Course | : PC |

RATIONALE:

Programming with C++ is a foundation course for any would-be IT professional. It gives exposure to the basic techniques of computer programming in current technological scenario. This course is most essential for any curriculum of Computer Science and Engineering.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Describe object-oriented programming (OOP) principles.
- Develop proficiency in C++ syntax and programming constructs.
- Implement advanced OOP features for software design.
- Demonstrate polymorphism and operator overloading.
- Handle exceptions and ensure robust program execution.

| Unit | Topic/Sub-Topic | | | | | |
|------|--|---------|--|--|--|--|
| No. | | Time | | | | |
| | | (Hours) | | | | |
| I | Introduction to object-oriented programming, user defined types, structures, | 12 | | | | |
| | unions, polymorphism, encapsulation. Getting started with C++ syntax, data- | | | | | |
| | type, variables, strings, functions, default values in functions, | | | | | |
| | recursion, namespaces, operators, flow control, arrays and pointers. | | | | | |
| II | Abstraction mechanism: Classes, private, public, constructors, destructors, | 11 | | | | |
| | member data, member functions, inline function, friend functions, static | | | | | |
| | members, and references. | | | | | |
| | Inheritance: Class hierarchy, derived classes, single inheritance, multiple, | | | | | |
| | multilevel, hybrid inheritance, role of virtual base class, constructor and | | | | | |
| | destructor execution, base initialization using derived class constructors. | | | | | |
| III | Polymorphism: Binding, Static binding, Dynamic binding, Static | 9 | | | | |
| | polymorphism: Function Overloading, Ambiguity in function overloading, | | | | | |
| | Dynamic polymorphism: Base class pointer, object slicing, late binding, | | | | | |
| | method overriding with virtual functions, pure virtual functions, abstract | | | | | |
| | classes. | | | | | |
| | | | | | | |

| IV | Operator Overloading: This pointer, applications of this pointer, Operator | 9 |
|----|--|---|
| | function, member and non-member operator function, operator overloading, | |
| | I/O operators. | |
| V | Exception handling: Try, throw, and catch, exceptions and derived classes, | 4 |
| | function exception declaration, unexpected exceptions | |
| | | |

| 1. | Object Oriented Programming with C++ by E. Balagurusamy, McGraw-Hill Education |
|----|--|
| | (India) |
| 2. | ANSI and Turbo C++ by Ashoke N. Kamthane, Pearson Education |
| 3. | C++: The Complete Reference - Schildt, McGraw-Hill Education (India) |
| 4. | C++ and Object Oriented Programming - Jana, PHI Learning. |
| 5. | Object Oriented Programming with C++ - Rajiv Sahay, Oxford |
| 6. | Mastering C++ - Venugopal, McGraw-Hill Education (India) |

TH:2- PROGRAMMING WITH PYTHON

| L 3 | T 0 | P 0 | | Course Code: CSE | PC 203/TH2 |
|-------------------|-----------|---------|------------------|------------------------|------------|
| Total Cont | act Hours | | | Theory Assessn | nent |
| Theory | | : 45Hrs | Total Marks: 100 | End Term Exam | : 70 |
| | | | Total Walks. 100 | Progressive Assessment | : 30 |
| Pre-Requis | site | : Nil | | | |
| Credit | | : 3 | | Category of Course | : PC |

RATIONALE:

Python is a versatile and beginner-friendly scripting language, renowned for its simplicity and readability. It enables rapid development of applications in fields like web development, data analysis, automation, and artificial intelligence. Learning Python equips students with a powerful toolset to solve complex problems and adapt to evolving technology demands.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Define Python's core syntax, data types, and key concepts of object-oriented programming.
- Explain how control structures and data structures function in Python.
- Implement Python programs using file handling, modules, and libraries like NumPy, Pandas, and Matplotlib for data analysis and visualization.
- Analyze Python scripts to identify and resolve logical or syntactic errors and optimize code using advanced techniques like recursion and lambda functions.
- Develop a real-world mini-project by integrating Python concepts such as OOP, libraries, and automation tools for practical problem-solving.

| Unit | Topic/Sub-Topic | Allotted |
|------|--|----------|
| No. | | Time |
| | | (Hours) |
| I | Introduction to Python: Overview of Python: Features and Applications | 8 |
| | Setting Up the Python Environment (Python Installation, IDEs), Python | |
| | Syntax: Variables, Data Types, and Operators Writing, | |
| | Executing, and Debugging Python Scripts | |
| II | Control Structures and Functions: Conditional Statements: if, else, elif | 8 |
| | Loops: for, while, and Nested Loops Functions: Defining, Calling, and | |
| | Scope of Variables Introduction to Lambda Functions and | |
| | Recursion | |
| III | Data Structures in Python: Lists, Tuples, Sets, and Dictionaries: | 8 |
| | Operations and Applications, List Comprehensions and Dictionary | |
| | Comprehensions Working with Strings: Methods and Manipulation, | |
| | Introduction to Python's Collections Module | |

| IV | File Handling and Modules: File Operations, Reading, Writing, and Appending Files Working with CSV and JSON Files, Python Modules: | 7 |
|----|---|---|
| | Built-In Modules (e.g., math, os, datetime) Creating and Using Custom | |
| | Modules | |
| V | Object-Oriented Programming (OOP) in Python: Understanding | 7 |
| | Classes and Objects Concepts of Encapsulation, Inheritance, and | |
| | Polymorphism, Working with Magic Methods and | |
| | Operator Overloading, Exception Handling in Python | |
| VI | Advanced Python and Applications: Introduction to Libraries: NumPy, | 7 |
| | Pandas, Matplotlib Basics of Web Scraping: Using requests and Beautiful | |
| | Soup, Scripting for Automation: Working with os and shutil Modules, Mini- | |
| | Project: Developing a Python Script for a Real-World | |

| Credit | | : 3 | | Category of Course | : PC |

RATIONALE:

Data structures are at the core of any computational process. Almost all computer programs use data structures. So, the knowledge of data structures is required to build the foundation of an IT professional. This course is intended to equip the student with the fundamental knowledge.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Explain fundamental data structure concepts, classifications, and algorithm analysis.
- Apply linear data structures such as stacks, queues, and their variations.
- Develop linked list structures, including singly, doubly, and circular linked lists.
- Implement non-linear data structures like trees and perform operations such as insertion, deletion, and traversal.
- Describe graph representations and traversal techniques for efficient data organization.

| Topic/Sub-Topic | | | | | | |
|---|---|--|--|--|--|--|
| | Time | | | | | |
| | | | | | | |
| Introduction to Data Structures: Basic Terminology, Classification of | 8 | | | | | |
| Data Structure, Operations on Data Structure, Asymptotic and worst-case | | | | | | |
| analysis of algorithms. | | | | | | |
| Linear Data Structures: Stacks-Introduction to Stacks, Array | 10 | | | | | |
| Representation of Stacks, Operations on a Stack, Applications of Stacks- | | | | | | |
| Infix-to-Postfix Transformation, evaluating Postfix Expressions. | | | | | | |
| Queues: Introduction to Queues, Array Representation of Queues, Operations | | | | | | |
| on a Queue, Types of Queues-DeQueue, Circular Queue, | | | | | | |
| Applications of Queues-Round Robin Algorithm. | | | | | | |
| Linked Lists: Singly Linked List, Representation in Memory, Operations | 14 | | | | | |
| on a Single Linked List, Circular Linked Lists, Doubly Linked Lists, Linked | | | | | | |
| List Representation and Operations of Stack, Linked List Representation and | | | | | | |
| | | | | | | |

TH:4- DIGITAL ELECTRONICS AND COMPUTER ORGANISATION

| L 3 | T 0 | P 0 | | Course Code: CSEI | PC 207/TH4 |
|---------------------|--------|---------|------------------|------------------------|------------|
| Total Contact Hours | | | | Theory Assessm | ent |
| Theory | | : 45Hrs | Total Marks: 100 | End Term Exam | : 70 |
| | | | Total Walks. 100 | Progressive Assessment | : 30 |
| Pre Requis | site | : Nil | | | |
| Credit | | :3 | | Category of Course | : PC |

RATIONALE:

Digital Electronics and Computer Organization form the foundation of modern computing, enabling the design and functioning of digital systems. They cover essential concepts like logic circuits, memory, and system architecture, bridging hardware and software integration. Learning these topics equips students with the skills to understand and develop efficient, reliable computing systems.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Define key concepts of digital electronics, including number systems, Boolean algebra, and logic gates.
- Explain the principles behind combinational and sequential circuits, such as multiplexers, flip-flops, and counters, and their applications.
- Implement simplified logic circuits using Karnaugh Maps and Boolean algebra to solve real-world digital design problems.
- Analyze the instruction cycle, memory organization, and processor architecture to evaluate system performance and identify bottlenecks.
- Design to simulate a basic CPU operation or create a functional digital circuit using the concepts of digital electronics and computer organization.

| Unit | Topic/Sub-Topic | |
|------|--|---------|
| No. | | Time |
| | | (Hours) |
| I | Introduction to Digital Electronics: Difference Between Analog | 8 |
| | and Digital Signals Number Systems: Binary, Octal, Decimal, and | |
| | Hexadecimal Conversion Between Number Systems, Binary | |
| | Arithmetic Boolean Algebra: Basic Operations, Laws, | |
| | and | |
| | Simplification | |
| II | Logic Gates and Circuits: Logic Gates: AND, OR, NOT, NAND, | 7 |
| | NOR, XOR, XNOR, Design and Simplification of Logic Circuits | |
| | Using Boolean Algebra, Karnaugh Maps (K-Maps) for Simplification | |
| | Practical Applications of Logic Gates in Real-World | |
| | Circuits | |

| Combinational and Sequential Circuits: Combinational Circuits: | 8 |
|---|--|
| Multiplexers, Demultiplexers, Encoders, and Decoders, Sequential | |
| Circuits: Flip-Flops (SR, JK, D, T) and Their Applications Counters: | |
| Synchronous and Asynchronous Counters Registers and Shift | |

| Credit | | : 3 | | Category of Course : PC | |

RATIONALE:

Algorithms form the backbone of computer science and software engineering. They enable efficient data storage, retrieval, and manipulation, while algorithms provide systematic methods to solve complex computational problems. Mastering the subject of Algorithms equips students with problem-solving skills essential for developing optimized, scalable, and robust software systems.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Define Algorithm with its characteristics.
- Write algorithms with pseudocode.
- Implement algorithms for sorting and searching using appropriate data structures.
- Analyze the time and space complexity of algorithms
- Design solutions using advanced data structures for real-world applications, such as shortest path problems or flow-based algorithms.

RATIONALE:

Programming with C++ is a foundation course for any would-be IT professional. It gives exposure to the basic techniques of computer programming in current technological scenario. It is most essential for any curriculum of Computer Science and Engineering. This course provides the student with the skill to write computer programming with C++ language.

Learning Objectives:

After completing this course, students will be able to:

- Implement object-oriented programming (OOP) concepts like encapsulation, inheritance, and polymorphism.
- Use control structures, functions, and recursion to solve programming problems efficiently.
- Work with C++ Standard Library components, including file handling and STL.
- Apply problem-solving techniques through hands-on coding exercises and small projects.
- Develop skills in writing, compiling, debugging, and executing C++ programs.

| Unit No. | Topic/Sub-Topic | | |
|-------------|---|---------|--|
| | | (Hours) | |
| I | Familiarization with C++ programming environment (Editor, Compiler, etc.) | 4 | |
| II | Programs using, I/O statements and various operators in C++ | 4 | |
| III | Programs using C++ expression evaluation and precedence | 4 | |
| IV | Programs using C++ decision-making statements and branching statements | 4 | |
| V | Programs using loop statements in C++ | 4 | |
| VI | Programs to demonstrate applications of n-dimensional arrays in C++ | 4 | |
| VII | Programs to demonstrate use of string manipulation functions in C++ | 4 | |
| VIII | Programs to demonstrate parameter passing mechanism in C++ | 4 | |

PR:3- DATA STRUCTURES AND ALGORITHMS LAB

| L 0 | T 0 | P 4 | | Course Code: CSE | CPC 215/PR3 |
|---------------------|--------|---------|------------------|------------------------|-------------|
| Total Contact Hours | | | 1 1 | Practical Assessment | |
| Theory | | : 60Hrs | Total Marks: 100 | End Term Exam | : 15 |
| | | | Total Walks. 100 | Progressive Assessment | : 35 |
| Pre-Requis | site | : Nil | | | |
| Credit | | : 2 | | Category of Course | : PC |

RATIONALE:

Data Structures and Algorithms (DSA) form the backbone of computer science and software engineering. They enable efficient data storage, retrieval, and manipulation, while algorithms provide systematic methods to solve complex computational problems. Mastering DSA equips students with problem-solving skills essential for developing optimized, scalable, and robust software systems.

LEARNING OUTCOMES:

After completion of the course, the students will be able to

- Explain basic terminologies and operations on data structures.
- Perform asymptotic and worst-case analysis of algorithms.
- Implement linear data structures.
- Apply trees and graphs to solve problems.
- Implement sorting and searching algorithms.

| Unit No. | Topic/Sub-Topic | Allotted Time |
|-------------|--|------------------|
| | | (Hours) |
| I | Introduction to Data Structures: | 2 |
| | Write a program to analyze and compare the time complexity of | |
| | basic operations (e.g., searching, insertion) on arrays and linked | |
| | lists. | |
| II | Linear Data Structures: | 12 |
| | Implement stack operations (push, pop, peek) using arrays and linked lists | |
| | Develop programs for applications of stacks (e.g., infix-to-postfix conversion and postfix evaluation) | |
| | Implement queue operations (enqueue, dequeue) using arrays and linked lists | |
| | Write programs for types of queues: circular queues and dequeue | |

| III | Linked Lists: | 10 | | | | |
|-----|--|----|--|--|--|--|
| | • Implement singly linked list operations (insertion, deletion, | | | | | |
| | traversal). | | | | | |
| | Write programs to create and manipulate circular and doubly | | | | | |
| | linked lists | | | | | |
| | Implement stack and queue operations using linked lists. | | | | | |
| IV | Non-Linear Data Structures: | 16 | | | | |
| | Implement binary tree operations (insertion, deletion, traversal) | | | | | |
| | Develop programs for types of binary trees (binary search tree, | | | | | |
| | AVL tree) | | | | | |
| | Implement graph representations (adjacency list, adjacency matrix) | | | | | |
| | Basic graph traversals (BFS, DFS). | | | | | |
| V | Sorting: | 10 | | | | |
| | • Implement sorting algorithms: bubble sort, selection sort, | | | | | |
| | insertion sort, merge sort, quicksort. | | | | | |
| VI | Searching: | 10 | | | | |
| | Write programs for searching using binary search trees (BST) and | | | | | |
| | hash tables | | | | | |
| Ì | Implement symbol table operations using balanced search trees. | | | | | |

PR:4- DIGITAL ELECTRONICS LAB

| L 0 | T 0 | P 4 | | Course Code: CSE | PC 217/PR4 |
|---------------------|--------|---------|-----------------|------------------------|------------|
| Total Contact Hours | | | 1 | Practical Assessment | |
| Theory | | : 60Hrs | Total Marks: 50 | End Term Exam | : 15 |
| | | | Total Walks. 30 | Progressive Assessment | : 35 |
| Pre-Requisite : Nil | | | | | |
| Credit | | : 2 | | Category of Course | : PC |

RATIONALE:

Digital Electronics form the foundation of modern computing, enabling the design and functioning of digital systems. They cover essential concepts like logic circuits, memory, and system architecture, bridging hardware and software integration. Acquiring skill on these topics equips students to understand and develop efficient, reliable computing systems.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Analyze the truth tables of all basic logic gates using CMOS and TTL logic.
- Implement Boolean expressions using logic gates.
- Design arithmetic circuits such as adders and subtractors using ICs.
- Construct sequential circuits, including flip-flops, shift registers, and counters.
- Develop digital circuits with a 7-segment display for counting applications.

| Unit No. | Topic/Sub-Topic | Allotted Time (Hours) |
|-------------|--|-----------------------------|
| I | To verify the truth tables for all logic gates: NOT, OR, AND, NAND, NOR, XOR, XNOR using CMOS Logic gates and TTL Logic Gates. | 6 |
| II | Implement and realize Boolean Expressions with Logic Gates. | 6 |
| III | Implement Half Adder, Full Adder, Half Subtractor, Full Subtractor using ICs | 6 |
| IV | Implement parallel and serial full-adder using ICs. | 6 |
| V | Design and development of multiplexer and De-multiplexer using multiplexer ICs | 6 |
| VI | Verification of the function of SR, D, JK, and T Flip Flops. | 8 |
| VII | Design controlled shift registers. | 6 |
| VIII | Construct a Single Digit Decade Counter (0-9) with a 7-segment display. | 8 |
| IX | To design a programmable Up-Down Counter with a 7-segment display. | 8 |

SUMMER INTERNSHIP - I

| L | T | P | | Course Code: SI 201 | |
|---------------------|-----------|-----|-------------------|-----------------------------|--|
| 0 | 0 | 0 | | Course Code: SI 201 | |
| Total Cont | act Hours | | | Internship Assessment | |
| Practical : 0 | | : 0 | Total Marks: 50 | End Term Exam : 15 | |
| | | | 10001172011150 00 | Progressive Assessment : 35 | |
| Pre-Requisite : Nil | | | | | |
| Credit | | : 2 | | Category of Course : SI | |

Duration: 3-4 weeks during summer vacation after 2nd Semester.

RATIONALE:

Summer Internship - I is to offer a structured and practical learning experience that prepares individuals for their future careers, helps them make informed career choices, and equips them with the skills and knowledge necessary to succeed in their chosen field. This course provides opportunities to students for hands-on industry experience.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

- Apply theoretical knowledge gained in their academic coursework to real-world
- situations.
- Develop and refine specific skills relevant to the field.
- Gains hands-on experience in a professional network by interacting with mentors
- and industry professionals.
- Learn to manage their time effectively.
- Clarify career goals.

DETAILED COURSE CONTENTS

SUGGESTED ACTIVITIES:

I Orientation:

- Introduction to the organization's mission, values, and culture.
- Familiarization with workplace policies, procedures, and safety guidelines.
- Orientation to the team and organizational structure.

II Project-Based Learning:

- Description of the main project or tasks the intern will be working on during the internship.
- Detailed project goals and objectives.
- Training and guidance on project-specific tools, technologies, or
- methodologies.

III Technical and Skill Development:

• Training sessions or workshops to enhance technical skills relevant to the internship role

- (e.g., programming languages, software tools, laboratory techniques).
- Soft skills development, including communication, teamwork, problem solving, and time management

IV Mentorship and Supervision:

- Regular meetings with a designated mentor or supervisor for guidance, feedback, and support.
- Mentorship objectives and expectations.

V Professional Development:

- Sessions on professional etiquette, networking, and building a personal brand
- Resume writing and interview preparation workshops.

VI Industry and Field-Specific Knowledge:

- Lectures, seminars, or presentations on industry trends, best practices, and emerging technologies.
- Guest speakers from the field to share insights and experiences.

VII Reporting and Documentation:

- Training on how to document project progress, results, and findings.
- Practice in creating reports, presentations, or other deliverables.

VIII Ethics and Professionalism:

- Discussions on ethical considerations within the field.
- Scenarios and case studies related to ethical decision-making

IX Feedback and Evaluation:

- Regular performance evaluations and feedback sessions.
- Self-assessment and goal-setting exercises.

X Networking and Industry Exposure:

- Opportunities to attend industry conferences, webinars, or networking events.
- Encouragement to connect with professionals in the field.

NOTE

As per AICTE guidelines, in Summer Internship-I, students are required to be involved in Inter/ Intra Institutional Activities viz;

- Training with higher Institutions;
- Soft skill training organized by Training and Placement Cell of the respective institutions;
- contribution at incubation/innovation/entrepreneurship cell of the institute;
- participation in conferences/ workshops/ competitions etc.;
- Learning at Departmental Lab/ Tinkering Lab/ Institutional workshop;
- Working for consultancy/ research project within the institutes and
- Participation in all the activities of Institute's Innovation Council for eg: IPR workshop/Leadership Talks/ Idea/ Design/ Innovation/ Business Completion/ Technical Expos etc.
